

吉罗瑞，您珍贵的合作伙伴！

吉罗瑞是一家充满活力的工厂，作为您全球的合作伙伴，为您提供如下欧盟认证的产品：电缆/软管卷筒，电力/流体旋转接头，集电环，流体旋转接头，运动电缆，以及电力设施（绝缘导电轨道/可导电钢头）；金属和塑料导电槽，电缆拖车等。这些产品可以完美地和匹配以下产品：高低液压旋转接头，电力滑环/液压复合接头，软管，连接器以及电缆。

DR-GLOBEEL, A VALUABLE PARTNER
 DR-GLOBEEL is a dynamic industrial company capable of working as a global partner, offering certified products: Cable reels/hose reels, Electrical/Fluid sliprings, Electrical collectors, Fluid couplings, Electrical cables for moving machines, Electrification systems (insulating power rails with copper head, Cansils with a metallic/plastic case, Electrification systems in passages, Cable trolleys, etc...). The product range is completed by the following accessories: fluid couplings for high and low pressures, electrical/Fluid sliprings, hoses, connectors, electrical cables.

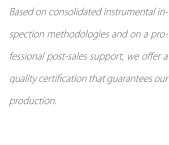

我们的技术人员奉行工业设计、结构和机械的基本原则，采用整体工艺设计原理生产技术方案，满足各类个性化需求。

Our technical personnel follows the design and construction of industrial facilities and machinery step by step, adapting to technical and application specific customer requirements with solutions targeted at and personalized for all needs

我们的工作是基于对工艺和技术娴熟掌握。因此，研发工作是重中之重。它使我们能够不断为客户提供完美而经济的解决方案。

Our work is based on a perfect mastery of forefront methodologies and technologies. Regarding research and development processes as extremely important, we offer innovative and economically favourable solutions.

基于互相关联的交叉检验，以及专业的售后流程，使我们能为您提供各类质量保证证书来保证您的产品。

Based on consolidated instrumental inspection methodologies and on a professional post-sales support, we offer a quality certification that guarantees our production.

卷筒

吉罗瑞卷筒产品主要包括电机驱动型的液压和电缆卷筒，以及弹簧回卷型的电缆和软管卷筒。型号众多的基本款和特殊款能够轻松满足客户的所有需求。

Our reel products include motorised, hydraulic, electrical, and spring operated cable and hose reels. Numerous basic and special models, to satisfy all the needs of our customers.

电机驱动型电缆和软管卷筒：

专门为苛刻环境设计，确保只需最少的维护；我们的产品系列包括电力电缆，同轴电缆和信号输送（比如CANBUS，以及各类高速信号）卷筒。

MOTORISED CABLE AND HOSE REELS

Designed for hard situations that require high reliability and minimum maintenance. Our product range includes electrical power cables, auxiliary/signals (can bus), high translation speeds.

弹簧回卷型电缆和软管卷筒：

在进行动态输送能源过程中，卷筒直接采用弹簧平衡弹簧进行回卷作业是一种比较高效和经济的方法。

SPRING OPERATED CABLE AND HOSE REELS

Operated by Archimedes spiral springs, with a distinguished performance, form an efficacious and economic solution for the electrical energy transmission to moving machines.

- 软管卷筒：适用于各类高压流体，如液压油，燃气和空气等；
- 电缆卷筒：电力传输，备用电缆和信号输送；
- 电缆/软管复合卷筒，测量卷筒，转角和距离输送装置；
- 轨道电控型卷筒；
- 自动弹簧回卷型软管和电缆卷筒； 适合于服务移动设备；
- EExd防爆型卷筒，适用于带有危险品的易燃易爆场合；
- 一大中小型手动型卷筒；

- Hose reels for oil pressure, hydraulics, gas, and pneumatics;
- Electrical cable reels for power, auxiliary, and signal machines;
- Combined electrical-fluid reels, measurement, angle and length transducers;
- Reels with an electronic traction control;
- Automatic spring operated cable and hose reels for feeding moving machines;
- EExd anti-deflagration reels for use in potentially explosive environments;
- Manual reels of small, medium, and large dimensions;

滑环

滑环是一种让电流从一个固定点连续传输到旋转点的装置。因此它被用来传输电力，控制信号，模拟和数字信号到旋转点上，广泛应用于各类吊车，旋转平台和机器，钻机平台和机床等。

Sliprings enable an electrical continuity from a stationary feeding point to the rotating parts, transmitting power and control signals, both analogue and digital. They are used on revolving cranes, rotating platforms and machines, drilling platforms and machine tools.

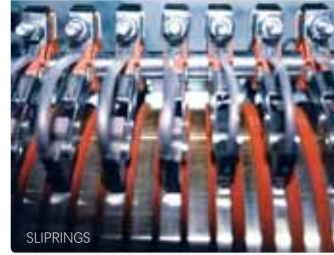

模块化的设计结构使得我们能够比较容易地实现各类应用需求，同时也能够很容易和各类液压旋转接头配合。

The modularity of construction makes it possible to realize all required types of collectors and to adapt them to specific application needs. Slip rings are realized with a completely modular system, and may be coupled with pairs for transporting fluids: specific works are available at request. The electrical insulation realized with special materials guarantees a high mechanical and thermal resistance.

由于采用高强度和高阻燃材料，我们可以按需制作高中低各类负荷的滑环，绝缘等级也可以从IP00到IP68，以及防爆型，抗压力型。

Works are carried out for high, medium, and low tension, in coverings whose protection classes range from IP00 to IP68, anti deflagration and pressurised systems.

- 流体旋转接头，适用于输送水，空气，油，和其它流体；
- 采用独特技术确保电刷和电环完美接触（铍接触电刷模块）
- 可以轻松传输各类数字信号和模拟信号，以及CAN 数据总线；
- 电流范围20到2000安培；
- 可用于连接EExd防爆设备。

- Rotary fluid couplings for transporting water, air, oil, and other fluids;
- Brushing contacts are realized with an exclusive technology that confers a perfect brush-ring adhesion (articulated brush block)
- Transmission of serial digital signals, can bus or the like;
- Electrical feeding from 20 to 2000 amperes;
- Electrical feeding in explosive environments, with EExd protection devices

流体旋转接头

吉罗瑞生产各类流体旋转接头，广泛应用于传输水，空气，油和其它流体。我们可以设计和制造任何尺寸和通道的流体旋转接头，并可以附加各类滑环。

FLUID COUPLINGS

DR-GLOBEEL builds rotary fluid couplings for transporting water, air, oil, and other fluids, for any diameter and any number of hydraulic passages. The application to the combination of rotary fluid couplings with sliprings is a solution that is increasingly asked for by users.

公司概况

吉罗瑞是一家富有活力的公司，具有几代技术传承和专业经验的积累，专注于移动能源传输这一细分市场。

公司提供宽广的产品系列，从标准产品到特种需求的研发和定制，以充分满足客户的各类工业应用。公司严格按照ISO 9001/2000证书标准组织研发、生产和销售。

DR-GLOREEL is a dynamic ISO 9001/2000 certified company, born out of decennial technological and professional experience matured within the leading companies in the sector of feeding of energy to moving machines.

The company offers a vast range of products, both standard and engineered ad hoc, to satisfy any kinds of needs. Thanks to its high level of competency,

THE PROFILE OF A PROFESSION

能源传输的背后是人

吉罗瑞每天的使命就是能源的传输，我们用丰富的经验、深刻的研究，以及矢志不渝的坚持达成我们的使命，务必超越标准，聆听客户需求并达到客户要求。我们紧跟客户的不同工作阶段，全过程贯穿并及时提供有效的服务。

BEHIND ENERGY THERE IS MAN

GLOREEL's everyday mission is energy transmission, a mission firmly supported by our experience, very well knowing the extent to which, even more so than standardisations, the capabilities of working in projects, listening to customers, following them in all phases of work, and providing a timely, thorough, and competent service are appreciated.

坚持高标准工艺和研发，使得吉罗瑞能够保证为客户提供简单、可靠和成熟的技术方案，并采用高质量的材料制造产品。多年来，公司的卓越表现得到了海内外众多客户的青睐。目前公司产品分布于各类工业领域：工程机械、各类工地、搬运提升设备、工矿企业、自动化行业和钢铁冶金、水处理、机器人、船舶工业等。

DR-GLOREEL guarantees simple, reliable, and secure technical solutions that are realized with high quality materials, and over the years it has achieved a significant specialization which is reaffirmed today by prestigious customer references also abroad.

The products of DR-GLOREEL are used in a multitude of industrial fields: earth moving (drilling crane trucks), work sites, moving and lifting, manufacturing industry, automation, iron and steel industry, water treatment, robotics, boats, and so on.
