

GLORREEL
吉罗瑞

电机驱动型电缆卷筒

Motorized cable reels

吉罗瑞 > 电机驱动型电缆卷筒

吉罗瑞是一家活跃在能源传输领域的技术型公司，具有代代相传的技术积累和行业经验，公司通过ISO9001/2015质量认证。

公司生产各类标准和定制卷筒，由弹簧驱动和电机驱动电缆卷筒和软管卷筒，以满足您的各类应用需求。

由于掌握高度的专业技术和工艺诀窍，吉罗瑞可以为您提供独特的技术解决方案。产品具有使用简单，安全可靠，制作精良的特点。

多年来吉罗瑞取得了令人瞩目的专业成就，在国内外客户中得道广泛赞誉。

产品基础信息

吉罗瑞电机驱动型电缆卷筒适用于向移动的机器提供电力，当电机驱动卷筒能使电缆可以按照机器运行需求进行动态伸缩，专配的电力滑环可以确保旋转的电缆和固定电缆之间的稳定的电力输送。

吉罗瑞电机驱动型卷筒配备力矩电机，或者高转差速电机，也可以采用三相电机，再根据需要加配变频器。

所谓力矩电机是一种特种电机，它可以在提供恒扭矩的情况下长期在某个位置停滞，也可以在被迫反转或者正转情况下，始终保持恒定扭矩。

一种典型应用是在需要恒张力情况下收放电缆或软管，往往需要变频器驱动一台异步三相电机来实时管理卷筒，以实现柔顺平滑的收放。

Motorized cable reels

DR-GLOREEL is a dynamic company certified ISO 9001/2015, born from decades of technological and professional experiences gained in leading companies in the field of energy supply.

The company produces a wide range of products, both standard and specifically engineered to meet every need.

Thanks to a high expertise degree DR-GLOREEL provides technical solutions, easy, reliable and safe, made with high quality materials; DR has achieved over the years a significant specialization confirmed today by the prestigious references of national and international customers.

General informations

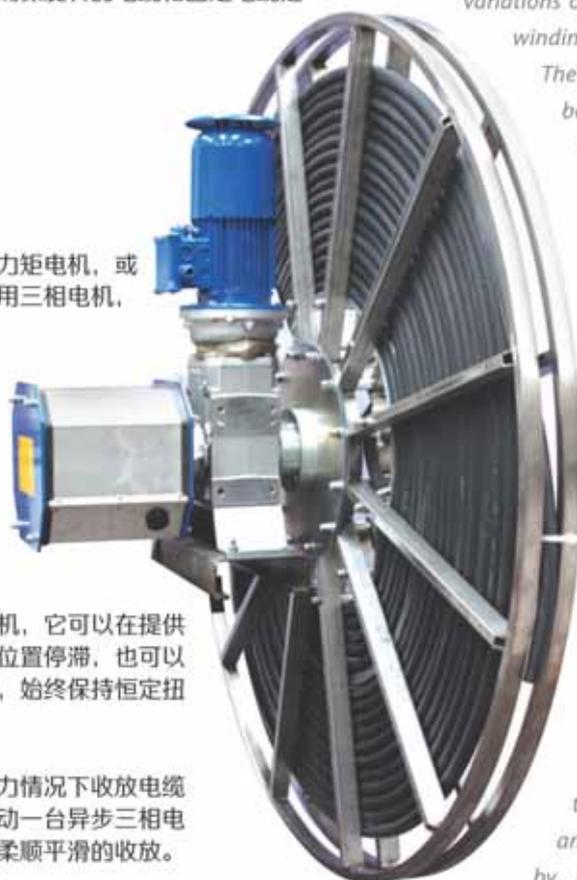

DR-GLOREEL motorized cable reels are suitable for every application needing to feed electrical power to a moving machinery. The length variations of the electric cable are allowed thanks to the winding/unwinding of the cable on a motorized spool.

The electric slipring ensures the electric continuity between the rotating wound cable and the fixed cable.

DR-GLOREEL outfits its motorized cable reels with "torque" motors (or "high slip" motors or three phase engings with or without inverter).

The "torque" motor is a special electric motor which can stay blocked in place or forced to counter-rotate for an endless time, providing a constant torque for different speeds of rotation or counter-rotation.

Its typical application is just on the cable or hose reels. In fact, these equipments must be able to wind or unwind the cable/hose while maintaining a constant tension on the cable same performances obtained with an asynchronous three phase motor managed by inverter, obtaining high malleability and management in real time of the device.

根据这种特定的应用，该力矩电机的表面温度可能会达到90°C。因此，就要配备一个独立于主轴转速的冷却风扇来提供恒定的风量，以保证电机在任何工况下都能得到合理的冷却。

另外，电机上配装一个电磁制动器，防止出现在卷筒停止工作时卷筒上电缆（或者软管）出现松弛。虽然电机线路接法与普通电机无异，但是需要注意电机旋转方向是否与电缆（或者软管）卷起和收放的标识方向一致。

Due to its special application, the "torque" motor can reach high surface temperatures (up to 90 °C), therefore, they are servo-ventilated by an auxiliary electric fan that generates a constant air flow independent on the rotational speed of the main motor and ensures optimal cooling in any working condition.

The motor is supplied with an electromagnetic brake which is preset by the manufacturer to prevent the unintentional unwinding of the cable when the cable reel is switched off. The electrical connection is that exactly the same as any other motor; it's only needed to check that the rotation direction results in the winding of the cable / pipe.

主要技术参数 / Main features

- 电缆直径: 6 ÷ 100mm.
Cable diameter: 6 to 100 mm.
- 最大电流: 20A ÷ 600A
Maximum current: 20A to 600A
- 加强型不锈钢支架
Rugged stainless steel frame
- 聚氨酯防腐漆
Corrosion-proof polyurethan painting
- 绝缘等级IP65欧标CEI EN 60529
Protection class: IP65 (CEI EN 60529)
- 防震动
Vibration-proof
- 可定制AISI 316L 不锈钢版
Available in stainless steel AISI 316 L version (on request)
- 滑环最大工作电压: 36KV
Max supply voltage of slipring: 36 kV

应用 / Fields of application

- 吊机
Cranes
- 卡车
Trucks
- 车库
Garages
- 路面吊
Mobile cranes
- 随车吊
Crane trucks
- 平台
Platforms
- 行车
Bridge cranes
- 钢铁厂吊
Cranes for steel plants
- 堆场
Scrap yards
- 履带吊
Crawler tractor-cranes
- 龙门吊
Gantry Cranes
- 集装箱吊机
Shore cranes

工作环境 / Operating conditions

吉罗瑞电缆卷筒按照恶劣环境和极端工况设计，它们适用于以下工作条件：

The DR-GLOREEL cable reels can be designed for use in severe environments and extreme operating conditions; they can be suitable for the following conditions:

- 温度范围: -40°C ÷ +80°C
Temperature range -40 °C +80 °C
- 抗凝露系统
Anti-condensation system
- 抗震
Vibration-proof
- 全不锈钢结构或者表面特殊处理
Total stainless steel construction or special superficial treatments
- 可用于海洋船舶和腐蚀性环境
Use in marine or corrosive environment

电缆卷筒没有特殊注明均不配备电缆及其接头等附件，如需选购敬请说明。
The cable reels aren't equipped with cable as standard; cables and connectors are available on request.

电缆选型

吉罗瑞电机驱动型电缆卷筒可以按照客户要求选配电缆，也可由客户自行选配。需要注意的是，当您选配电缆时请根据具体工况按照电缆厂家提供的技术参数进行选配。

吉罗瑞根据您提供的电缆参数，如传输功率、温度范围、长度和放置条件（比如电缆缠绕圈数等情况）等条件来匹配合适的卷筒。

Cable selection

The DR-GLOREEL motorized cable reels can be supplied with or without electric cable. The electric cable must be carefully selected basing on the operating conditions and analyzing the technical specifications supplied by the cable producer.

DR-GLOREEL can perform the dimensioning of the cable basing on the necessary informations, like electric power, temperature range, length and laying conditions (number of turns wound on the spool, etc.).

电缆选型指南

表1显示了各种电缆截面的承载电流，实际电流可以运用所示公式，即功率和电压的函数计算。

交流 电流 / Alternate Current - AC

$$I = \frac{P \times 1000}{\sqrt{3} \times U \times \cos \phi \times \eta}$$

直流 电流 / Direct Current - DC

$$I = \frac{P \times 1000}{\sqrt{3} \times U \times \cos \phi \times \eta}$$

I = 电流 (A)
current (A)
P = 功率 (kW)
electric power (kW)
U = 电压 / voltage (V)
voltage (V)
cosφ = 功率因数 (= 0.8)
power factor (= 0.8)
η = 效率 / efficiency (= 0.85)
efficiency (= 0.85)
A = 电缆截面 (mm²)
cable section (mm²)

Cable selection guide.

Table 1 shows the current capacity for each cable section. Current can be calculated using the formulas beside, as a function of electric power and voltage.

表1 / Table 1

功率 POWER		η %	cos φ	直流电 / DIRECT CURRENT - DC						交流电 / ALTERNATE CURRENT - AC					
kW	Hp			110V		220V		380V		220V		380V		500V

典型应用 / Typical applications

水平安装应用 / Horizontal applications

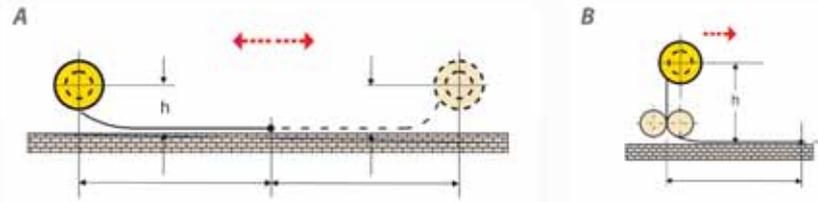

卷筒水平安装在移动设备上卷起来和释放设备电缆，如图A，卷筒即可以单向工作，也可以双向工作。如图B，水平安装高度大于1.5米需要增加双滑轮导向。

Reel is mounted on the moving equipment, winds and pays-out cable into a tray or other surface. One, or two, ways payout (fig. A). The application becomes a modified retrieve lift (fig. B) when reel mounts more than 1,5 m above ground and uses double sheave guide.

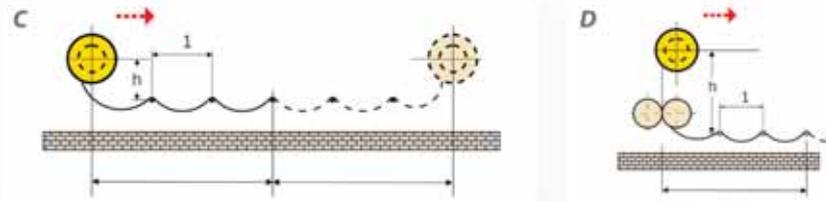

如上所述，电缆可以根据 ℓ 的最大距离采用直接回卷排列在卷筒架上（图C），也可以通过导向轮来回收（图D）> 直接回收： ℓ = 最大1m
> 通过滚轮： ℓ = 1-3m

As above, however cable recovery on round support brackets or rollers at regular intervals (fig. C), or cable guided in a cable-guide (fig. D).
> For brackets: ℓ = max 1m. > For rollers: ℓ = from 1 to 3m.

卷筒安装在移动机器上 / Reel mounted on moving machinery 电缆通过导向压轮 / Cable on rollers

卷筒安装在移动机器上 电缆通过导向压轮 / Reel mounted on moving machinery, cable on rollers

卷筒固定安装

卷筒固定安装后，电缆会连接在移动的机器上。电缆回卷是采用直接回收还是通过导向滑轮，取决于常规支撑长度 ℓ 如图E。

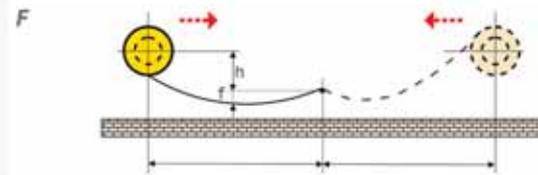

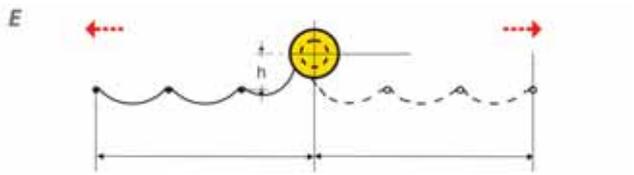

Reel mounted stationary

Reel is mounted stationary; cable fixed point is on moving machinery. Cable recovery on round support brackets or rollers at regular intervals (fig. E).

卷筒装载移动的机器上，而电缆悬空。电缆平悬于空中，如图F，并靠二头支撑，因此会有一个根据总长产生的自然允许下垂量 f 。

Reel mounted on moving machinery, cable suspended

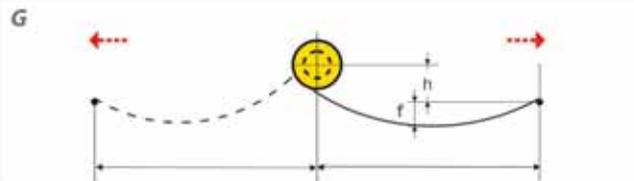

Cable is suspended horizontally in the air (fig. F), supported only at both ends, allowing a standard sag f in the relation to ℓ or L , whatever is longer.

卷筒固定 电缆悬空 / Reel stationary, cable suspended

参考图F，也可以象图G那样，卷筒固定安装，而电缆悬空。

As case F, but reel mounted stationary (fig. G).

垂直安装应用 / Vertical applications

图H，卷筒装载移动机器上垂直向下出线。

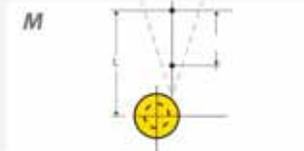

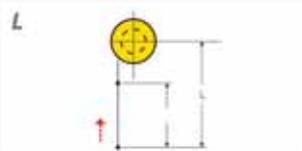

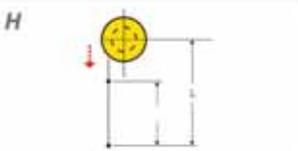

Reel on moving machinery downwards
Reel on moving machinery downwards (fig. H). Cable fixed point below.

卷筒固定安装，图L电缆向下放线。

Reel stationary, cable downwards
Reel stationary (fig. L).
Cable unreel downwards.

向上出线，图M，无论卷筒固定还是移动。

Cable upwards
Reel on moving machinery or Stationary (fig. M). Cable unreel upwards.

符号解释 / Legend

ℓ = 有效长度
Operational length of the cable

ℓ = 支撑间隔
Supports intervals

L = 卷筒到电缆末端的最长距离
Max length between reel and end of cable

h = 回收点到卷筒中心的高度
Height of reel above recovery surface

f = 下垂距离
Cable sag

主要参数 / Features

- 聚氨酯亮光漆防腐
- 绝缘等级IP55 EN 60529
- 抗震动
- AISI 304不锈钢卷鼓
- 可反转
- 符合CEI EN 60309-1标准
- 滑环最高电压680V
- 收放速度可达120m/min
- Polyurethane varnish resistant to corrosive environments
- Protection degree: IP55 (CEI EN 60529)
- Vibration proof
- Drum in stainless steel AISI 304
- Reversible rotation by request
- Reference Standard CEI EN 60309-1
- Max slipping voltage: 680V
- Winding/unwinding speed up to 120m/min

AM4

主要参数 / Features

- 聚氨酯亮光漆防腐
- 绝缘等级IP55 EN 60529
- 抗震动
- AISI 304不锈钢卷鼓
- 可反转
- 符合CEI EN 60309-1标准
- 滑环最高电压680V
- 收放速度可达120m/min
- Polyurethane varnish resistant to corrosive environments
- Protection degree: IP55 (CEI EN 60529)
- Vibration proof
- Drum in stainless steel AISI 304
- Reversible rotation by request
- Reference Standard CEI EN 60309-1
- Max slipping voltage: 680V
- Winding/unwinding speed up to 120m/min

AP2

主要参数 / Features

- 聚氨酯亮光漆防腐
- 绝缘等级IP55 EN 60529
- 抗震动
- AISI 304不锈钢卷鼓
- 可反转
- 符合CEI EN 60309-1标准
- 滑环最高电压680V
- 收放速度可达90m/min
- Polyurethane varnish resistant to corrosive environments
- Protection degree: IP55 (CEI EN 60529)
- Vibration proof
- Drum in stainless steel AISI 304
- Reversible rotation by request.
- Reference Standard CEI EN 60309-1
- Max slipring voltage: 680V
- Winding/unwinding speed up to 90m/min

外形尺寸 / Overall dimensions

For all further information and specifications on the winder please contact us.

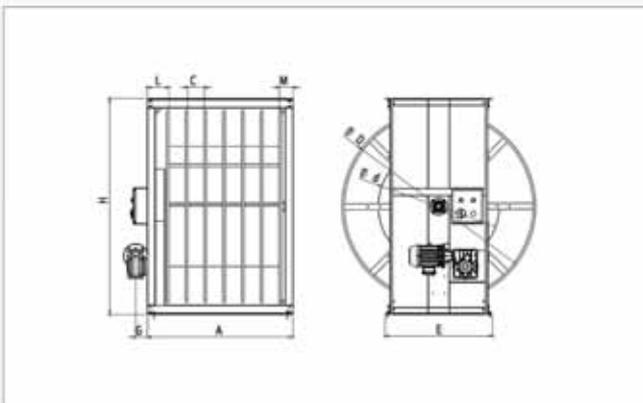

STAKER ACM2

主要参数 / Features

- 聚氨酯亮光漆防腐
- 绝缘等级IP55 EN 60529
- 抗震动
- AISI 304不锈钢卷鼓
- 可反转
- 符合CEI EN 60309-1标准
- 收放速度可达15m/min
- 含电控箱
- 可整体堆叠和搬运
- Polyurethane varnish resistant to corrosive environments
- Protection degree: IP55 (CEI EN 60529)
- Vibration proof
- Drum in stainless steel AISI 304
- Reversible rotation by request
- Reference Standard CEI EN 60309-1
- Winding/unwinding speed up to 15m/min
- Electric control panel
- Stackable and transportable for a complete storage

外形尺寸 / Overall dimensions

CAV

主要参数 / Features

- 聚氨酯亮光漆防腐
 - 绝缘等级 IP55 EN 60529
 - 抗震动
 - AISI 304不锈钢卷鼓
 - 可反转
 - 符合CEI EN 60309-1标准
 - 滑环耐压36KV
 - 收放速度可达15m/min
 - 电滑环（可选）
 - 单独沟槽或侧装多行程架
- Polyurethane varnish resistant to corrosive environments
 - Protection degree: IP55 (CEI EN 60529)
 - Vibration proof
 - Drum in stainless steel AISI 304
 - Reversible rotation by request
 - Reference Standard CEI EN 60309-1
 - Max slipping voltage: 36 kV
 - Winding/unwinding speed up to 15m/min
 - Electric slipping (optional)
 - On request single groove or multiple race with the side frame

MX
ATEX

主要参数 / Features

- 适用于易燃易爆环境
- 聚氨酯亮光漆防腐
- 绝缘等级IP55 EN 60529
- 抗震动
- AISI 304不锈钢卷鼓
- 可反转
- 符合CEI EN 60079-0/1标准
- 滑环最高电压680V
- 收放速度可达90m/min
- Anti-deflagrating cable reel for explosive atmospheres
- Polyurethane varnish resistant to corrosive environments
- Protection degree: IP55 (CEI EN 60529)
- Vibration proof
- Drum in stainless steel AISI 304
- Reversible rotation by request
- Reference Standard CEI EN 60079-0/1
- Max slipring voltage: 680V
- Winding/unwinding speed up to 90m/min

特殊应用

随着个性化和定制化卷筒业务的发展，吉罗瑞审时度势，设计和开发了各类先进的动力输送系统：电力、液压、气动等的传输。

这些先进的系统往往具有遥控，自动排绳和理绳，防止电缆自转以及速度稳定装置等等。

Special executions

The demand for personalized cable reels tailored for specific industrial requirements is constantly increasing; for this reason DR-GLOREEL has specialized in the design and implementation of advanced supply systems.

The special cable reels can be equipped with remote control systems, automatic cable laying devices, rotating cable stops, stabilizers, and a lot more.

更小巧的电缆定位器

吉罗瑞开发的迷你电缆定位器，除了节省空间，最主要的优点是精度更高。它能轻松整理2000m直径（ $\Phi 4-6\text{mm}$ ）的信号电缆。

*Winder with smaller cable locator.
The accuracy DR-GLOREEL allows developing winders space efficient and small weight, which can accommodate up to 2000 m of signal cable ($\Phi 4-6\text{mm}$).*

光纤信号的连续输送

吉罗瑞开发的光纤卷筒能够在不增加中继接器情况下，对50对以上光纤信号进行无损传输。

*Winder continuous optical fiber.
The technology developed by DR-GLOREEL allows to construct a winder without collector, and therefore without loss of signal, with rates over 50.*

特殊环境下的应用

吉罗瑞还为特殊环境提供卷筒方案，这些场合往往除了电缆本身需要保护外，卷筒本身也必须得到完善的保护。

Winders faired for special environments. The DR-GLOREEL design office enables the development of solutions for very harsh environments, where not only the cable, but all the winder must be protected.

附件 / Accessories

金属网套 C810 / Metal sheath C810

- 防止电缆被过度机械拉伸
- 也可供AISI不锈钢版本
- Disponibile versione in acciaio AISI
- Useful to prevent high mechanical stress on cable
- Available in stainless steel AISI

单根电缆导向器 GQ Simple cable guide GQ

- 最大承载电缆 $\Phi 80$
- 可供不锈钢版本
- 可供其他规格
- Suitable for cables up to $\Phi 80$
- Available in stainless steel
- Available in various dimensions

电缆导向器 / Cable guide

GC-圆形电缆 / GC-Round cable

- 最大承载电缆 $\Phi 85$
- 滚轮可配轴承或不配轴承
- 可供不锈钢版本
- Suitable for cables up to $\Phi 85$ mm
- Available with or without bearings inside the rollers
- Available in stainless steel

MFA电缆卡位盒 Anchorage and reversal box MFA

- 最大承载电缆 $\Phi 85$
- 可供不锈钢版本
- Suitable for cables up to $\Phi 85$ mm
- Available in stainless steel

MF电缆卡位盒 / Anchorage box MF

- 最大承载电缆 $\Phi 85$
- 可供不锈钢版本
- Suitable for cables up to $\Phi 85$ mm
- Available in stainless steel

RGS滚轮导向支撑 Roller cable guide with support RGS

双棍 - Double

单棍 - Single

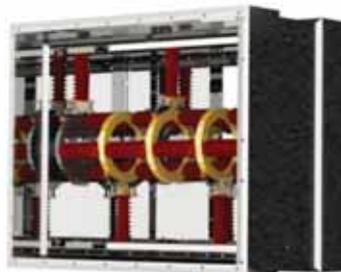

- 最大承载电缆 $\Phi 85$
- Suitable for cables up to $\Phi 85$ mm

Solo per media tensione / Only for medium voltage

- 自动电缆排放器
- Automatic cable distributor

- 高压滑环
- Slipring in high isolation environment

- 旋转限位器
- Rotating limit stop
